SUMMARY

Detailed-oriented self-taught Frontend Website Developer with nearly 2 years' experience with various web technologies. Highly adept for both independent and collaborative projects.

RELEVANT EXPERIENCE

Social Media Website

- Developed a custom social media website, which includes basic features like posts, likes, comments, updates, updating of password and profile picture.
- Developed a section where the final year student can upload a copy of their projects, which can be downloaded by the other students.

Swift Courier Exchange

- Developed a website for a logistic company, which displays information about the company,
- A functionality for creating of shipments and tracking of shipments.
- The website also includes functionality for the admin to be able to update shipment status, and a dashboard for an overall overseeing of all active, completed and cancelled shipments.

Christ Liberty Assembly

Developed a website for the church, Christ Liberty Assembly containing key sections such as:

- A page for displaying sermons, each sermon contains a link, which redirects the user to a website which it was posted such as Facebook or YouTube (this was designed based on the church's preference).
- A page to display articles and a page for each article. The link to each article can be shared on Facebook, WhatsApp or the copied to clipboard.
- A search functionality to filter out articles by title and sermons by title or preacher.
- A gallery page that displays images of the church.
